DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This is a three story brick apartment building detached on the left side and is three bays wide and approximately four bays in depth with a two story "L" shaped wing being four bays long and two bays wide with a side balcony. There is also a one story, one bay square addition. All brickwork is unpainted common bond and as observed from the side, the third story was added at a later date. The first floor has a simple, but attractive, entranceway in the right bay consisting of glass over panels double doors, headed by a narrow one pane transom with the transom bar trimmed with quarter round dentils. On the left are two 2/2 sash windows with new metal lintels as over the doorway. The first floor area had been a shop with a Victorian front with two narrow doorways, but it has been reconstructed to match its period style except for the arches. Upper floor windows are of 2/2 sash with segmental arches covered by segmental hoods of a very plain moulded design and with dropped ears. There are old style interior louvered and paneled shutters on the front windows. Rear area windows are of 6/6 panes with wood lintels and sills. Rear doors are paneled and have old four pane overlights. The roof of the front section slopes to the rear and the wing has a shed roof, both of metal. There is a small enclosed chimney on the left wall of the front section. The front cornice is moulded and supported by fluted consoles separating and ending the bays and is trimmed by a row of square dentils and a row of carved dentils angled on the ends. The brick frieze is painted white. The building rests on a low fieldstone foundation.
